## Jenkins CI

Added by Vidhya Shankar Goel on May 29th, 2024

Disable

vprofileicd ▼

Jenkins CI is a customizable continuous integration server with over 600 plugins, allowing you to configure it to meet your needs.

This integration will post build notifications to a channel in Slack.

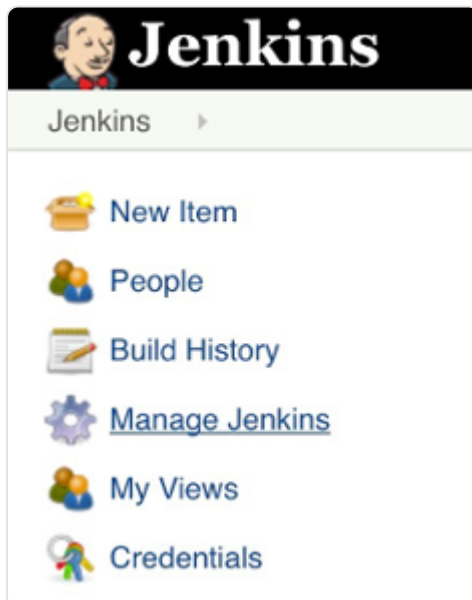

### Setup Instructions

close

Here are the steps necessary to add the Jenkins CI integration.

**Note:** These instructions are for v2.8. To install an older version, go down to **Previous Setup Instructions**.

**Step 1** In your Jenkins dashboard, click on **Manage Jenkins** from the left navigation.

**Step 2** Click on **Manage Plugins** and search for **Slack Notification** in the **Available** tab. Click the checkbox and install the plugin.

Manage

[Slack Notification](#)

This plugin is a Slack notifier that can publish build status to Slack channels.

2.8

Build

### Step 3

After it's installed, click on **Manage Jenkins** again in the left navigation, and then go to **Configure System**. Find the **Global Slack Notifier Settings** section and add the following values:

- **Team Subdomain:** `vprofilecid-xbk4663`
- **Integration Token Credential ID:** Create a secret text credential using `nurUFkDUV7vtANGgYS6ASfnx` as the value

The other fields are optional. You can click on the question mark icons next to them for more information. Press **Save** when you're done.

**Note:** Please remember to replace the Integration Token in the screenshot below with your own.

Build

**Step 5** Then you'll need to add **Slack Notifications** to the **Post-build Actions** for this project.

**Step 6** In the **Slack Notifications** section, choose the events you'd like to be notified about.
